Making it easy to save water and protect the environment

Quickly press FULL FLUSH/ECO FLUSH button
in remote to full flush once,
and long press to eco flush once.

Function Introduction

Foot sensor flushing

Intelligent induction automatic flushing,
convenient for men to flush after urinating

Function Introduction

Super siphonic flush

Wide and deep
pipes for strong
water output

Multi-scour
design

Powerful flush

Siphon flush,
prevent clogging

Function Introduction

Soft LED night light

Microwave induction automatic flip

Smart induction, easy to open and close .Automatically flush after leaving.
Reduce exposure to germs, healthy and hygienic

When a person approaches the smart toilet for about 1 meter, the toilet lid automatically opens, and when the person leaves the smart toilet for about 5 minutes, the toilet lid automatically closes. (If you hold it by hand or if a child accidentally presses the toilet lid that turning up automatically, based on external pressure the lid will not be forced to automatically open , which will protect the child in a humane manner)

1. When the seat ring and seat cover are all closed, the signal is triggered when a person walks into the smart toilet about 1m distance. The cover automatically flips up;

2. When the seat cover is opened and the seat ring is closed, the foot induction signal is triggered when the seat is off, and the seat ring is turned up;

3. When both the seat ring and seat cover are opened, the foot sensing signal is triggered, then close the seat ring/seat cover and flush once;

4. When in seated state, foot sensor switch is shielded, that is, the sensor is invalid.
